

Hong Kong Advanced Data Talent Training Scheme

Capture Policy Opportunities with Precision

Align with national and GBA-level policy directions to gain insights into data market trends and future opportunities.

Enhance Practical Competence

Systematically master core skills in data asset identification and management, compliant development and registration, cross-border application, and commercial implementation.

Connect with Top-Tier Resources

Engage with Canton Data Exchange's "數據人才生態圈", connect with leading Chinese Mainland enterprises, and explore opportunities for cross-border professional collaboration.

Background

To support Hong Kong's legal and professional services sector in keeping pace with national policy developments, seizing emerging opportunities in the data economy, and strengthening cross-border compliance and data governance capabilities, the Canton Data Exchange, in collaboration with the eBRAM International Online Dispute Resolution Centre (eBRAM), has designed the Hong Kong Advanced Data Talent Training Scheme.

The scheme is structured around the pillars of policy interpretation, practical case studies, scenario-based experience, and professional certification, with a focus on data governance, cross-border compliance, data governance and commercialisation, and digital asset innovation. It aims to equip members of Hong Kong's legal and professional communities with the knowledge and practical skills essential in the data-driven era.

Scheme Advantages

Authoritative Endorsement and Strong Industry Connections

Highly Practical and Industry-Oriented Learning Approach

Certifications with High Recognition
